### Reasons

Despite negative surprises for the stock market in Federal Budget 2015-2016 the stock market depicted strong performance during June with the benchmark KSE 100 Index rising by around 4%, extending the gains in FY2015 to around 16%. Investors brushed aside increase in capital gains tax and increase in tax on dividend income on investment in shares and levy of one-off super tax on corporates and banks with 4.5%-6% impact on FY2015 earnings. On the contrary, a decent rally was witnessed post budget announcement driven by a combination of reasonable stock market valuations, easy monetary conditions, and rerating theme driven by improving macroeconomic fundamentals.
