Reasons

The KSE - 100 index increased by 4.77% (1,580.29 points) to close at 34,719.29 points. We attribute this strong recovery in the stock market to above expected corporate results announcements, tapering in the foreign selling, and rebound in the regional and global stock markets. Moreover, attractive valuations of the stock market coupled with ultra low yield on the alternative fixed income avenues also drew investor's interest in the stock market.
